SUMMARY

Experienced Front End Developer with over 6 years of proficiency in designing, implementing, and maintaining scalable web applications. Skilled in front-end and having idea of back-end technologies, adept at collaborating with cross-functional teams to deliver high-quality solutions that meet client needs. Proven track record of utilizing a wide range of programming languages, frameworks, and databases to drive innovation and optimize performance

SKILLS

Frontend Skills - HTML, CSS, JavaScript, React Js, React Native, Angular, Bootstrap.

Backend Skills - Node js, MongoDB, Express Js.

Tools - Git, Postman, Redux.

EXPERINCE

Software Development Engineer II

Aug 2018 – present

Aspire Infolabs Global Pvt. Ltd

- Implemented various business functionalities using React and React Native.
- Designed and developed reusable React Js common components which are being used across multiple modules.
- Designed and discussed about the project deliverables with the Product Manager and the UX Lead.
- Worked on creating APIs to fetch data and integrating these APIs into applications.
- Responsible for handling web apps to be responsive over different devices.

Internship

Jun 2017 – Oct 2017

Srushty Global Solutions Pvt Ltd

- Developed a responsive website for bringing awareness about the issue to the public.
- Developed the admin panel for accessing and updating the data.

PROJECTS

HAPPILY HEALTH - Health and Wellness Mobile App.

link - app 

Managed a team of 4 cross-functional members in creating a cross-platform health and wellness app using React Native, focusing on front-end functionality and user experience. I collaborated with the design and development team to deliver a user-friendly, visually appealing, and easy-to-navigate app that has received positive feedback from users.

CREDR - Application to Buy & Sell Used Bikes & Scooters.

link - credr.com 

Elevated platform stability and functionality by swiftly resolving production bugs and integrating new URLs into the frontend environment. Led the development of a new internal tool feature, collaborating closely with backend counterparts for seamless API integration. Actively engaged in project meetings to proactively identify and tackle emerging challenges.

MYCLNQ - App for taking care of family healthcare needs.

link - app 

Developed a feature to locate the nearest clinics quickly and efficiently. Implemented an online appointment booking system to save time and reduce waiting periods. Designed a user-friendly interface to help users discover top doctors and healthcare services.

ACCELECOM SERVICES - *Backend development for syncing actions between two application*

Designed and implemented task synchronization functionality between disparate applications using Spring Boot framework. Utilized RESTful APIs and data mapping techniques to ensure efficient and reliable data transfer.

BODY BEAT - *Vital Tracker Mobile App.*

Led the front-end development of an app that integrates and tracks health and fitness data from various sources, such as wearables and other devices, to provide users with a comprehensive overview of their health status. This allowed users to easily monitor and manage their health, making it a more user-friendly and efficient experience.

OCEANEERING - *Backend development for a Subsea Engineering Company.*

As a backend team member, I worked with external APIs, and MongoDB, and developed new GraphQL APIs to provide clients with data access. The project aimed to create a cutting-edge system for cargo owners to have better visibility and understanding of maritime operations

EDUCATION

B.tech, Computer Engineering

2014 – 2018

Indian Institue of Information and Technology Design and Manufacturing, Kancheepuram

Cgpa: 7.5

Class 11-12

Jun 2012 – May 2014

Sasi Junior College

Percentage: 96.3%

Class 10

2012

Vijnana Vihara Residential School

Cgpa: 8.4
